UHI MACHINERY TRACTOR WARRANTY

5-YEAR LIMITED WARRANTY POLICY

This limited 5-year warranty is subject to all eligibility, servicing, usage and exclusion provisions set out within this full document. Front-end loader and implements are covered under a separate 12-month parts-only warranty. Australian Consumer Law statutory guarantees remain unaffected by this manufacturer's warranty.

This Warranty is provided by UHI Machinery Pty Ltd ("UHI Machinery") to the original retail purchaser. It is in addition to any non-excludable rights and remedies available under the Australian Consumer Law. Nothing in this Warranty excludes, restricts or modifies any rights that cannot be excluded by law.

1. Warranty Benefits

Subject to continuous full compliance with every condition contained within this document, UHI Machinery Pty Ltd provides the following limited warranty commencing on the original date of purchase from an authorised UHI Machinery outlet:

1.1 Five-year parts warranty for tractor main-unit components proven, in UHI Machinery's sole absolute discretion, to suffer defects arising solely from faulty original workmanship or raw materials.

1.2 Five-year labour warranty for engine and drivetrain assemblies: authorised service labour costs will be covered for manufacturing defects within engine and drivetrain groups only.

1.3 Important limitations:

- All technician travel, call-out fees, machine transport and towing expenses shall be the sole responsibility of the machine owner under this warranty. No reimbursement for such costs will be provided by UHI Machinery.
- Front-end loader, buckets, rams and all third-party or factory-fitted implements are excluded from the tractor 5-year warranty and governed exclusively by the separate 12-month implement parts-only warranty set forth in Clause 7.
- Remedies under this warranty are at UHI Machinery's sole option: either repair or supply replacement defective parts. No monetary refunds shall be provided under this warranty scheme. Under no circumstances shall UHI Machinery be liable for incidental, special, indirect or consequential damages including, without limitation, lost profits, business interruption, site downtime or rental-equipment costs.

1.4 Engine coverage

Engine coverage includes the crankcase, oil pan, cylinder head, rocker arm cover, timing gear cover, and all components fully enclosed within these units, subject to this policy.

1.5 Drivetrain coverage

Drivetrain coverage includes the transmission, differential, final drives, drive axles, front axles, power take-off and clutch housing, as well as components fully enclosed therein. The clutch assembly is excluded.

1.6 Detailed component schedule

Specific warranty coverage items and details are as described in Schedule 1. The component-specific coverage, warranty periods, parts and labour entitlements, and exclusions stated in Schedule 1 prevail over any inconsistent general coverage description in this policy. The general eligibility, servicing, usage, claim procedures and damage and failure exclusions in this policy continue to apply.

2. Warranty Eligibility Conditions

All conditions below must be continuously satisfied throughout the entire five-year warranty term. Failure to satisfy any single condition may result in immediate suspension or complete voiding of all 5-year-warranty entitlements, as determined in the sole absolute discretion of UHI Machinery.

2.1 Original-purchaser non-transferable requirement

This warranty benefit extends exclusively to the first-end-user consumer purchasing the tractor directly from an authorised UHI Machinery sales outlet. **The registered owner must create and maintain an active account on the official UHI Owner Portal system supplied by UHI Machinery to retain warranty eligibility.** This warranty is strictly non-assignable and non-transferable upon resale, change of operator or change of physical ownership. Any subsequent owner acquires zero entitlements under this five-year warranty. Units sourced via private sale, auction platforms, eBay, Gumtree, third-party grey-market importers or any non-authorised dealer are ineligible for this 5-year limited warranty.

Additional eligibility exclusions: this warranty does not apply to second-hand or used goods, goods sold at auction, goods subject to an insurance write-off, or ex-demonstrator machines with 50 operating hours or more.

2.2 Permitted-use definition (commercial-use assessment)

The tractor is intended for private-hobby-farm / non-revenue-generating domestic-style operation. UHI Machinery holds sole absolute discretion to assess whether machine usage constitutes commercial-nature operation. Commercial-nature use includes, but shall not be limited to: contracting-work for third parties, machine rental, large-scale revenue-producing agricultural enterprise, or any deployment generating direct or indirect business income. If UHI Machinery determines the machine has been subject to commercial-nature use, the five-year warranty shall automatically terminate.

2.3 Mandatory servicing obligations (owner bears all servicing costs)

1. Mandatory initial service by a UHI-authorised service agent: T SERIES 20 hours; LGF & AUPAX SERIES 50 hours.
2. All subsequent periodic servicing must be performed by a UHI-authorised service agent, occurring whichever comes first: every 200 operating hours OR every 12 calendar months.
3. The owner shall maintain continuous full lubrication in strict accordance with the operator manual specifications.
4. **Post-service online documentation upload requirement: Upon completion of each scheduled service, the owner or authorised service agent must upload complete, legible service records, work-orders, hour-meter readings and fluid-change receipts to the owner's dedicated machine profile within the UHI Owner Portal for UHI review and validation. All servicing evidence must be submitted to the portal within three (3) calendar-days after each service is performed. weblink https://uhimachinery.com.au/warrantyrecord/login.php**

UHI Warranty Registration

It is the owner's non-delegable duty to ensure all service documentation is successfully uploaded and stored within the UHI Owner Portal for every service event across the full warranty duration. Upon reasonable written request from UHI Machinery, the owner must make the portal-lodged servicing records available promptly. Missing, incomplete, delayed or non-uploaded service records shall entitle UHI Machinery to reject any warranty claim, irrespective of whether the alleged defect bears any causal link to service-compliance failures.

2.4 Operation, modification and consumable-specification rules

1. All machine operators must receive adequate documented training for safe and lawful tractor operation per operator-manual guidance.
2. No repair, disassembly, adjustment, modification, attachment-fitment or fitment of non-UHI-approved replacement-parts may occur without prior written approval issued by UHI Machinery. Any unauthorised alteration to mechanical, hydraulic, electrical or structural systems shall place the full 5-year warranty at risk of being voided.
3. Only oil, filters, coolants and lubricants matching UHI-approved specifications may be utilised within the machine. Damage triggered by incorrect fluid grades, mixes or substitute consumables is excluded from warranty-benefit coverage.

Use UHI-approved UDT transmission / hydraulic oil, or an equivalent meeting UHI-approved specifications, and UHI-approved engine oil or an equivalent as recommended in the Operator's Manual. Maintain the tractor using UHI genuine parts supplied by UHI or authorised dealers, or replacement parts approved in writing by UHI Machinery.

4. The owner shall perform ongoing routine-cleaning including regular removal of radiator-core debris. Damage originating from blocked radiators and resultant overheating shall not qualify for warranty remedy.
5. Where UHI Machinery recommends engineering updates, retrofits or component enhancements for field-fleet machines, the owner shall facilitate installation of such improvements. Refusal to implement recommended engineering changes permits UHI Machinery to suspend or terminate warranty entitlements.

3. Consumable and Wear-and-Tear Components

The following items are classified as consumable or normal-wear parts and receive zero coverage under the five-year tractor limited warranty regardless of operating circumstances:

Bolts, nuts and washers, oil hoses, hydraulic piping, electrical wiring, plugs and connectors, all filter assemblies, oils, coolants and greases, globes / lamps, clutch assemblies, brake pads, gear levers and operator controls, front-end-loader frames, hydraulic rams, buckets, bucket teeth, all fasteners, cabin glazing and cabin accessories, drive belts, wheels and tyres, chains, tracks, cables, cutting blades, cooling fans, reversing-camera assemblies and air-conditioning systems, plus any further components reasonably deemed subject to service-wear in UHI Machinery's sole judgement.

4. Damage and Failure Exclusions

This five-year warranty shall not apply to any fault, failure or damage where UHI Machinery determines (in its sole absolute assessment) the root cause arises (in whole or partial contribution) from any of the following circumstances:

(a) Scheduled routine maintenance and natural fair wear-and-tear;

(b) Accidental impact-damage, force-majeure events, acts of terrorism;

(c) Improper customer-arranged transport, inadequate on-site storage, incorrect installation;

(d) Misapplication, over-loading, neglect, abuse or unlawful operation of equipment; torque-, twist- or leverage-related damage originating from front-loader, backhoe or attachment operation;

(e) Any unauthorised disassembly, repair, adjustment or modification work;

(f) Secondary damage triggered by attached third-party implements and accessories;

(g) Non-compliance with required service intervals, servicing performed by non-authorised parties or incomplete / lost service documentation or failure to upload completed service records to the UHI Owner Portal within the required three-day timeframe;

(h) Radiator blockage, debris accumulation and consequential overheating-related component failure;

(i) Adverse operating-environment conditions including extreme temperature fluctuation, power-supply surges, insect or rodent infestation, meteorological-event damage;

(j) Use of non-approved fluids, lubricants or consumables; abnormal performance induced by external ancillary-equipment interference;

(k) Failure to install UHI-recommended engineering revisions or field-updates;

(l) Any other operator-negligence-related event.

Note: Even where manufacturing defect may partially contribute to failure, partial involvement of any above-listed excluded cause allows UHI Machinery to decline the warranty-claim entirely.

Additional exclusions

(m) Deterioration due to environmental exposure, chemical corrosion or external contamination;

(n) Depreciation, or damage caused by continued operation after a malfunction was noticed or reported by the operator;

(o) Property damage or personal liability, including personal injury, arising out of failure or malfunction of the UHI product, to the extent permitted by law;

(p) Freight charges for parts not available at UHI authorised dealers, or parts ordered urgently, by air freight or by special freight;

(q) Parts or components covered under separate manufacturer warranties, including batteries, tyres, injectors, injection pumps, air conditioners, belts, hoses, glass, light bulbs, upholstery and rubber/plastic components, where this policy does not expressly provide a conflicting UHI warranty entitlement. Any independently provided manufacturer warranty remains subject to that manufacturer's terms.

5. Warranty Claim Procedure

5.1 Upon discovery of suspected defect, the owner must not commence any disassembly or repair work without first obtaining explicit prior written claim-acceptance from UHI Machinery via a formal claim submission lodged through the UHI Owner Portal. Costs for any work undertaken without pre-approval submitted and acknowledged via the portal will not be honoured under warranty and may result in forfeiture of remaining warranty rights.

5.2 To lodge a claim, the owner shall complete the online warranty-claim form inside the UHI Owner Portal and upload: original purchase documentation, machine serial-number identification, complete historical service records already stored on the portal, written description of fault, supporting photographs / video evidence and current hour-meter reading as reasonably requested by UHI Machinery. UHI Machinery reserves the right to require physical machine inspection at a location nominated by UHI Machinery. Paper-only, email-only or verbal claims will not be accepted unless exceptional circumstances are pre-authorised in writing by UHI management.

5.3 Warranty notification must be formally submitted via the UHI Owner Portal within 7 calendar-days of first detecting the reported fault. Late portal-submitted claims may be rejected at the sole discretion of UHI Machinery.

5.4 Assessment of whether a failure qualifies for warranty remedy rests solely within the absolute discretion of UHI Machinery, based primarily on documentation and service history held within the UHI Owner Portal.

5.5 If physical inspection concludes the reported failure falls outside warranty scope, all inspection-related travel, labour and diagnostic-charges shall be payable by the machine owner.

6. Limitation of Remedies

UHI Machinery's total obligation under this five-year limited warranty and any implied warranty is limited exclusively to supplying replacement defective-parts and covering authorised engine-and-drivetrain-related labour for confirmed manufacturing defects. UHI Machinery excludes liability for all incidental, consequential, special or indirect loss including loss of profit, downtime or site-operation costs to the fullest extent permitted under applicable Australian law. Nothing within this clause modifies or removes statutory consumer-guarantee rights afforded by the Australian Consumer Law.

7. Separate 12-Month Parts-Only Warranty for Front-End Loader and Implements

UHI Machinery provides a separate twelve-(12)-month parts-only warranty for factory-supplied front-end-loader assemblies and implements starting from the original purchase date.

- Proof-of-purchase and defect evidence must be submitted via the claimant's UHI Owner Portal account within seven (7) calendar-days of component failure and prior to expiry of the 12-month implement-warranty period. Postal, email-only or hard-copy submissions without corresponding portal upload will not be deemed valid.
- Wear-parts excluded: blades, ripper tynes, scarifier points, digging tynes, tyres, clutch-friction plates, V-belts and post-hole-digger cutting bits receive no implement-warranty coverage.
- Modified implements automatically forfeit implement-warranty entitlements. UHI Machinery holds sole authority to determine whether a reported implement-failure constitutes valid manufacturing-defect. No labour, travel or transport costs are covered under this implement-warranty.
- No dealer or sales-agent possesses authority to vary or extend implement-warranty terms on behalf of UHI Machinery. All implement-warranty claims must be lodged directly via the UHI Owner Portal following the claim-lodging rules defined in clause 5.

8. General Provisions

Product specifications may be revised without notice as part of UHI Machinery's continuous-product-improvement program. UHI Machinery incurs no obligation to retrofit design improvements to previously-delivered machines. **The UHI Owner Portal is the official single source for all machine-specific warranty and servicing records; records held externally and not validated on the portal shall carry no official standing for warranty purposes.** This document constitutes the full-expression of UHI Machinery's five-year tractor-warranty; no verbal statements, sales-floor commentary or informal correspondence shall override written clauses within this formal warranty-policy document.

Governing Law: This warranty is governed by the laws applying in the Commonwealth of Australia.

Schedule 1 Detailed Component Warranty Schedule

The component entries and tick positions below are reproduced from the supplied detailed schedule. All entries are subject to the general eligibility conditions, servicing requirements, permitted-use requirements, damage and failure exclusions and claim procedures in this policy.

Specific coverage details: The specific warranty coverage items and details are as described in this Schedule. For each component, the selections in this Schedule determine its applicable warranty period, parts and labour entitlement, and excluded status, and prevail over inconsistent component coverage descriptions elsewhere in this policy. General eligibility conditions, servicing obligations, permitted-use requirements, damage and failure exclusions, and claim procedures in the policy remain applicable. An item marked "Excluded" has no coverage under the tractor warranty specified in this Schedule. Front-end loader and implements remain subject to the separate 12-month parts-only warranty in clause 7.

Legend: A black tick indicates the selection in the supplied schedule. A blank cell indicates no selection and does not establish coverage or exclusion on its own. The original column labels are retained below.

SERVICE CHECKPOINTS - WHICHEVER OCCURS FIRST

Initial service	T SERIES: 20 HRS | LGF & AUPAX SERIES: 50 HRS
200 HRS / 1st YR	200-hour service checklist
400 HRS / 2nd YR	400-hour service checklist
600 HRS / 3rd YR	Same service content as 200 HRS
800 HRS / 4th YR	Same service content as 400 HRS
1000 HRS / 5th YR	Same service content as 200 HRS

After the series-specific initial service, follow the 200-hour / annual checkpoints above, whichever occurs first. Annual servicing remains required when the corresponding hours have not been reached. Record the next due hours and date at each service.

DAILY MAINTENANCE CHECKLIST

- ☐ Check air filter
- ☐ Check wheel nut tension
- ☐ Check clutch and brakes
- ☐ Check battery
- ☐ Check hydraulic oil level
- ☐ Check tyre pressure
- ☐ Check lighting system
- ☐ Grease all points

Use fluid grades, filters and replacement parts specified for the applicable model in its Operator's Manual and UHI-approved specifications. Keep service invoices and receipts with this log book.

INITIAL SERVICE

T SERIES: 20 HRS | LGF & AUPAX SERIES: 50 HRS

Complete the checklist and service record for this visit.

SERVICE CHECKLIST

Tick each completed task. Record any omitted or inapplicable item in the notes.

- ☐ Change engine oil
- ☐ Change engine oil filter
- ☐ Change fuel filter
- ☐ Check air filter
- ☐ Check front differential oil
- ☐ Check front planetary oil level
- ☐ Check transmission / rear differential oil
- ☐ Check hydraulic oil level
- ☐ Check engine coolant level
- ☐ Check wheel nut tension
- ☐ Check tyre pressure
- ☐ Check clutch and brakes
- ☐ Check lighting system
- ☐ Check battery
- ☐ Grease all points
- ☐ Check front-end loader operation (if fitted)
- ☐ Check 3-point linkage operation (if fitted)
- ☐ AUPAX ONLY: Change hydraulic oil, transmission oil, rear differential oil and hydraulic oil filter.
